## POWERVAT 650

Rigid Vat Design with FEP Film

- For high-viscosity resins
- For large, massive parts
- Long-lasting components with replaceable FEP film

# FlexVat & PowerVat

Features	FlexVat	PowerVat
Standard accessory part of all printer deliveries	✓	
Additionally available		✓
Premium material quality for best printing results	✓	✓
Optimized for easy changes of resins	✓	
Optimized for serial production of sophisticated parts		✓
Automatic lock mechanism		✓
Highest printing speed (VDFS-compatible)	✓	
Material can be stored in vat		✓
Easy cleaning	✓	✓
3D printing of very large parts (such as dental models, molds, etc.)		✓
3D printing of fine structures with highest accuracy	✓	
3D printing of high-viscosity resins		✓
High material capacity (500 ml) for 3D printing big parts		✓
